- Example citation [1]
- Example file ref `uit.sty`

The Bibliography Block

Jane Doe. "An example bibliography entry." `https://www.ctan.org/pkg/beamer`

Angle Test

- The split can be drawn with different parameters

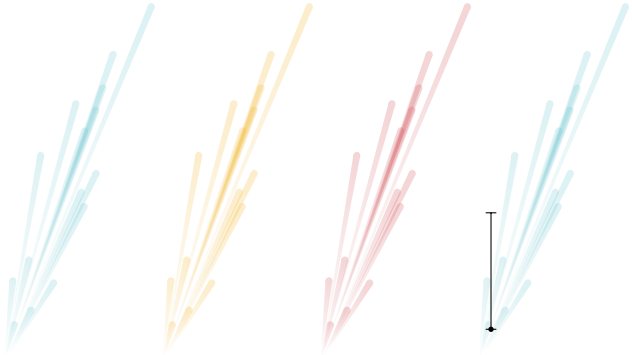

- The split can be placed with transparency, as seen in UiT's example report covers

Rays Test

- Here are the rays by themselves, without being cut off by the background. The scale on the 4th shape shows the origin and height parameters, which are based on the title page.

Regular frame with background rays

To add decorative rays in background,
use the `bgelement` option when including the `uit` inner theme.
